

Soham Pansare

Full Stack Developer

Profile Summary

Aspiring Software Engineer with a strong command of Python and Java, and experience in building full-stack web applications. Skilled in automating development workflows and optimizing processes using Linux-based tools. Currently pursuing a B.E. in AI & Data Science, aiming to leverage solid coding fundamentals to build scalable software solutions.

Education

- 2024–2028 **B.E. in Artificial Intelligence and Data Science**, *Vidyavardhini's College of Engineering and Technology*, Mumbai
- **Relevant Coursework:** Data Structures & Algorithms, Object-Oriented Programming (OOP), Database Management Systems (DBMS), Operating Systems (OS).

Experience

- Upcoming **Technical Head**, *Startup Venture*, Remote
- Architecting and owning the full backend infrastructure, including API design, database schema, and server-side logic.
 - Planning backend migration from Express.js to FastAPI to improve scalability.
- July **Software Engineering Fellow**, *Headstarter AI*, Remote
- 2024–Aug 2024
- Developed responsive, event-driven web applications using React.js, ensuring cross-browser compatibility.
 - Integrated AI-powered features by consuming external RESTful APIs, enhancing user interaction and application intelligence.
 - Designed modern user interfaces using **Material UI**, following responsive and accessible design principles.
- Aug **Web Developer**, *Gotoalibag.com*, Remote
- 2021–June 2022
- Deployed and managed a full-scale CMS using **WordPress**, serving as a digital hub for local tourism.
 - Optimized site performance and UX by configuring and customizing essential plugins.

Key Projects

- Geofencing Attendance System**, *React.js, SpringBoot, PostgreSQL*
- **Built** a full-stack, location-based attendance application with a **React.js** frontend and **SpringBoot** backend.
 - **Implemented** geofencing logic to validate user coordinates against authorized zones, preventing attendance fraud.
 - **Utilized** Spring Data JPA with PostgreSQL for data persistence and user record management.

1/2

NeuralOps, OpenAI Codex API, Node.js, React.js

- **Built** an AI-powered developer operations tool at the **OpenAI Codex Community Hackathon**, enabling natural language-driven task automation.
- **Integrated** OpenAI Codex API for intelligent code generation and workflow orchestration within a team setting.

RoadPulse, FastAPI, MongoDB Atlas, React.js, Leaflet.js

- **Engineered** a crowdsourced road quality monitoring system with a **React/Vite** dashboard, **MongoDB Atlas** backend, and dual FastAPI microservices.
- **Implemented** real-time geospatial data visualization using Leaflet.js and Recharts.

SafeCity, FastAPI, Gemini API, Leaflet.js

- **Developed** a smart crime mapping and predictive policing platform within a 24-hour hackathon.
- **Integrated** the Gemini API for AI-driven predictive analysis with a FastAPI high-performance backend.

Developer Workflow Automation Suite, Python, Git, Bash

- **Developed** a CLI-based automation tool to streamline project initialization, reducing setup time by **90%**.
- **Scripted** auto-generation of project directories, Git repository initialization, and VS Code environment setup.

Technical Skills

Languages	Python, JavaScript (ES6+), TypeScript, Java, GDScript, SQL, HTML5, CSS3
Frontend	React.js, Vite, Material UI, Leaflet.js, Recharts
Backend	FastAPI, Node.js, Express.js, Django, Spring Boot
Databases	MongoDB, PostgreSQL, Supabase, MySQL, Firestore
Tools	Git, GitHub, Postman, VS Code, Godot Engine, PylInstaller
Operating Systems	Linux (EndeavourOS/Mint/Ubuntu), Windows

Extracurriculars & Achievements

Hackathon	OpenAI Codex Community Hackathon, NeuralOps Built an AI-powered developer tool with a team, leveraging the OpenAI Codex API for workflow automation.
Game Jam	Game Jam Participant Developed a physics-based browser game within a strict 14-day deadline, shipped under pressure.
Research	Technical Paper Writer Authored a client research paper structured in IEEE format on Artificial Intelligence trends.
